Action Requested: APPROVE

NAPA VALLEY TRANSPORTATION AUTHORITY
TAC Agenda Letter

TO: Technical Advisory Committee

FROM: Kate Miller, Executive Director

REPORT BY: Diana Meehan, Senior Planner
(707) 259-8327 / Email: dmeehan@nvta.ca.gov

SUBJECT: Transportation Fund for Clean Air (TFCA) Program Manager Projects List for Fiscal Years Ending (FYE) in 2019 through 2021 (Three-Year Program)

RECOMMENDATION

That the TAC Recommend the Napa Valley Transportation Authority (NVTA) Board approve the Transportation Fund for Clean Air (TFCA) Program Manager Three-Year Projects List for Fiscal Years Ending (FYE) in 2019 through 2021 allocating $594,227.

EXECUTIVE SUMMARY

On February 21, 2018 the NVTA Board approved the expenditure plan and opened a call for projects for the TFCA Program Manager Funds which closed on March 23, 2018. Two projects were submitted by NVTA, no projects were received from other jurisdictions. The proposed final list of projects for FYE 2019 through FYE 2021 is shown in Table 1 below. All projects have undergone a cost effectiveness analysis and are eligible to receive funds. Approved projects must be submitted to the BAAQMD by November 2, 2018 to meet the programming deadline.

Table 1: Proposed Three-Year Cycle FYE 2019-2021 TFCA Program Manager Projects

FYE 2019-2021 TFCA Expenditures	**Amount**
Administration Costs for FYE 2019	$12,931
Imola Park and Ride Express Bus Improvements (FYE 2019 & 2020)	$381,296
Napa Valley Vine Trail Calistoga to St. Helena (FYE 2021)	$200,000
TOTAL	**$ 594,227**

*FYE 2020 and 2021 Estimates are $380,000 and will be updated when annual fund estimate is received

FISCAL IMPACT

Is there a Fiscal Impact? Yes, TFCA eligible projects totaling $594,227 (including administrative costs) will be funded with FYE 2019 through FYE 2021 revenues.

Is it currently budgeted? Yes.

Where is it budgeted? TFCA funds.

Future fiscal impact? No.

Consequences if not approved? TFCA FYE 2019 through FYE 2021 Projects will not be funded.

BACKGROUND AND DISCUSSION

The Transportation Fund for Clean Air (TFCA) is a grant program, funded by a $4 surcharge on motor vehicles registered in the Bay Area. This generates approximately $22 million per year in revenues. The purpose of the TFCA program is to provide grants to implement the most cost-effective projects in the Bay Area that will decrease motor vehicle emissions, and thereby improve air quality. Forty percent of the DMV funds generated in Napa are returned to the NVTA for distribution to local projects. The remaining sixty percent is allocated by the BAAQMD under the Regional Program. Projects must have an air quality benefit and be cost effective. Air District rules and statutes only allow funds to be retained for two years unless an extension is requested. Bicycle projects are not allowed an extension and funds programmed to bicycle projects must be expended in 2 years.

NVTA adopts a list of projects annually to be funded by the TFCA Program Manager funds. Historically, the call for projects has been extended and program funds have been rolled over due to lack of eligible project submissions from jurisdictions. Unused TFCA program manager funds can be allocated to other counties, although this has not yet occurred. At the February TAC meeting, staff proposed programming TFCA funds for a three-year cycle similar to the State Transportation Improvement Program (STIP) in order to aid in local planning processes.

The TFCA program can fund a wide range of project types, including the construction of new bicycle lanes; shuttle and feeder bus services to train stations; ridesharing programs to encourage carpool and transit use; bicycle facility improvements such as bicycle racks and lockers; electric vehicles and electric vehicle infrastructure; and arterial management projects that reduce traffic congestion such as signal interconnect projects.

Napa County has approximately $594,227 in Program Manager Funds for FYE 2019 through FYE 2021. This amount includes $12,931 set aside for Administration costs for NVTA in the FYE 2019 Expenditure Plan, plus an additional estimated $380,000 for FYE 2020 and 2021.

SUPPORTING DOCUMENTS

Attachment: (1) FYE 2019-2021 TFCA Applications

PROJECT INFORMATION

A. Project Number: 19NAP01

B. Project Title: Imola Park & Ride-Phase 1 Express Bus Platform Improvements
Bicycle and Pedestrian access improvements

C. TFCA County Program Manager Funds Allocated: $ 359,296

D. TFCA Regional Funds Awarded (if applicable):$_____

E. Total TFCA Funds Allocated (sum of C and D):$ 359,296

F. Total Project Cost: $2,700,000

Indicate the TFCA dollars allocated (C, D and E) and total project cost (D). Data from Line E (Total TFCA Funds) should be used to calculate C-E.

G. Project Description:

Grantee will use TFCA funds to relocate existing bus stop to Imola Avenue and improve the Imola Park and Ride facility. Two new bus stop platforms will be constructed on the northbound and southbound SR29 ramps. The project includes construction of sidewalk, curb and gutter on the south side of Imola Ave. from the Imola Park & Ride lot to the southbound bus platform . Additional pedestrian crossing improvements will be made for access to the northbound platform. (Attachment A)Long term bicycle parking in the Park and Ride lot will be included to encourage first/last mile connections by bicycle.

These improvements are designed to improve frequency and reduce running time and improve accessibility for the Route 29 Express to the Vallejo Ferry Terminal and El Cerrito Del Norte BART station. Currently, the Route departs from the Soscol Gateway Transit Center in the center of Napa off of the SR29 Corridor. Relocating the stop to the Imola Avenue ramps will significantly reduce running time for the route.

Based on the NVTA Express Bus Study, it is anticipated that increased frequency and reduced running times will result in a 10-15% increase in ridership on the Route 29. This equates to approximately 160 one-way trips per day, up from 144 currently at the Soscol Gateway Transit Center.

H. Final Report Content: Final Report form and final Cost Effectiveness Worksheet

A Final Report Form 1 for Smart Growth Projects/Transit Information will be provided upon completion of the project

8. Emission Reductions (ROG, NOx & PM)	0.79	2.37	Tons
9. TFCA Project Cost - Cost Effectiveness (ROG, Nox & PM)		$151,384	/Ton
10. TFCA Project Cost - Cost Effectiveness (ROG, NOx & Weighted PM). THIS VALUE MUST MEET POLICY REQUIREMENTS.		**$140,462**	**/Ton**

Notes & Assumptions

Provide all assumptions, rationales, and references for figures used in calculations.

Project sponsor will use TFCA funds to construct new express bus platforms and update the Imola Park and Ride facility including
Bicycle and Pedestrian infrastructure improvements. These improvements are identified in the NVTA 2017 Express Bus Study.

6 month average on/off for Route 29 Express Bus Service to El Cerrito Del Norte BART Station at Soscol Gateway Transit Center were 144/day
Based on the NVTA Express Bus Study (2017) NVTA anticipates that increased frequency and reduced running times will result in a 10-15% increase in ridership on Rt. 29
This equates to 158-165 one-way trips per day, up from 144 trips once the stop is relocated to the Imola Park and Ride

Trip distance (one-way) to El Cerrito Del Norte BART from Imola P & R	33 miles
Projected trips per day per NVTA Travel Behavior Study with Imola P&R improvements	160 avg.
Days/Year based on 20 days/mo. Weekday commute trips	240

RIDESHARING, BICYCLE, SHUTTLE, AND SMART GROWTH PROJECTS

Source for CO2 Values calculated by Amir Fanai (BAAQMD) using EMFAC 2007 V2.3

a - ROG = HC * 1.26639

b - Mileage based emissions factors were calculated using conversion factors from Table D-28 of the Moyer guidelines.

f - No diesel buses have been certified to the 0.5 g/bhp/hr for the 2004-2006 model year emission standard.

CO2 from EMFAC 2014, includes both RUNEX, other CO2 emissions averaged over VMT for a total per mile figure. Ken Mak, updated Dec 12, 2016

ARB Table 5-F:

Natural Gas Urban Buses (g/mile)[b] 33,000+ lbs

EO Certification Standards (g/bhp-hr)		ROG[a]	NOx	Exhaust PM2.5	Exhaust PM10	Other PM	CO2
5.0 NOX	0.10 PM10	6.33	20.00	0.37	0.40	0.996	2,535.04
5.0 NOX	0.07 PM10	6.33	20.00	0.26	0.28	0.996	2,535.04
4.0 NOX	0.05 PM10	5.07	16.00	0.18	0.20	0.996	2,535.04

Source for "Other PM": Methods to Find the Cost-Effectiveness of Funding Air Quality Projects Table 1. Average for Tire Wear, Brake Wear, and Road Dust values. PM2.5 converted to PM10.

Source for PM10: Carl Moyer Guidelines, July 11, 2014, Table D-6

Source for CO2 Value: EMFAC 2007 for Diesel Urban Bus, aggregate value for CO2_RUNEX(Pavley I+LCFS) for all model years. Methodology suggested by Dennis Wade from ARB; natural gas vehicles are certified to deisel standards. - Avra Goldman

a - ROG = HC * 1.26639

b - Mileage based emissions factors were calculated using conversion factors from Table D-28 of the Moyer guidelines.

f - A majority of the natural gas urban buses have been certified to the optional standards. Therefore, these values are based on the optional standards.

g - many natural gas urban buses have been certified to optional standards below this level.

PROJECT INFORMATION

A. Project Number: 21NAP01

B. Project Title: Napa Valley Vine Trail- Calistoga to St. Helena Segment

C. TFCA County Program Manager Funds Allocated: $ 200,000

D. TFCA Regional Funds Awarded (if applicable):$_____

E. Total TFCA Funds Allocated (sum of C and D):$ 200,000

F. Total Project Cost: $9,100,000

G. Project Description:

Grantee will use TFCA funds to construct a Class I Multi-use facility from the City of Calistoga to the City of St. Helena. This segment is primarily adjacent to the SR29 corridor, a high volume two-lane highway that currently lacks adequate bicycle and pedestrian facilities. The total segment length for this project is 9.1 miles. The total project once complete will be a total of 47 miles, from Calistoga to the Vallejo Ferry Terminal.

The Class I facility will consist of a 10' wide paved path with 2' shoulders on either side. Crossing improvements (HAWK Signals and ladder crossings) will be installed to facilitate safe crossings along the route.

H. Final Report Content: Final Report form and final Cost Effectiveness Worksheet

A Final Report Form 3 for Bicycle Projects will be provided upon completion of the project

I. Completed Cost Effectiveness Worksheet attached

7. CO2 Emissions Reduced	212.2	636.6	Tons
8. Emission Reductions (ROG, NOx & PM)	0.38	1.15	Tons
9. TFCA Project Cost - Cost Effectiveness (ROG, Nox & PM)		$173,971	/Ton
10. TFCA Project Cost - Cost Effectiveness (ROG, NOx & Weighted PM). THIS VALUE MUST MEET POLICY REQUIREMENTS.		**$160,642**	**/Ton**

Notes & Assumptions

Provide all assumptions, rationales, and references for figures used in calculations.

TFCA funds will be used to construct a 9.4 mile Class I section of the Napa Valley Vine Trail from Calistoga to St. Helena
The project is adjacent to the SR29 Corridor and will serve multiple schools, residences, commuters and visitor destinations.

The ADT on SR29 adjacent to the project is approximately 30,000

Project length	9.4mi		
ADT	30,000	0.8	**240 one way trips reduced**

RIDESHARING, BICYCLE, SHUTTLE, AND SMART GROWTH PROJECTS
