SUBJECT: October-December Calendar Year 2024 Quarter 4,
Measure T Quarter 2 Fiscal Year 2025 Analysis and Financial Update

RECOMMENDATION

That the Napa Valley Transportation Authority-Tax Agency (NVTA-TA) Board receive the most recent Measure T analysis and financial update.

BACKGROUND AND DISCUSSION

Tax Analysis

From October through December, Napa Valley Transportation Authority (NVTA)'s receipts were 0.9% higher than the same sales period in 2023. However, after adjusting for reporting anomalies, actual sales showed a 2.4% decline.

The ongoing slowdown in the wine industry led to an almost 9% drop in related revenues this quarter. Although some tourism-related sectors saw modest gains—including nearly a 1% increase in fine dining, which contrasts with a 5% decline statewide—the slowdown in the wine sector continued to impact convenience and liquor stores as well as food service equipment sales in the food-drug and business-industry categories.

The general consumer goods category saw an 8.6% increase, buoyed by the opening of a new outlet and a more than 7% rise in online shopping. However, these gains masked weakening performance in family apparel, home furnishings, and specialty stores.

For the second quarter in a row, declining global crude oil prices contributed to a 17% drop in tax receipts from service stations. Persistent high interest rates, fluctuating tariff policies, and general economic uncertainty continued to dampen activity in the building and construction sector.

New motor vehicle purchases by residents declined in line with statewide trends, while used vehicle registrations rose by 8%.

Net of aberrations, taxable sales for all of Napa County declined 2.1% over the comparable time period; the Bay Area was down 0.5%.

Sales Tax Receipts in the Current Year

Table 1, below, lists the monthly receipts for FY 2024-25 for July through February. The forecast for the current year has been updated to reflect recent revenue trends. The revenue forecast for FY 2024-25 has been adjusted downward for a second time from the original projection of \$26,500,000 to \$25,200,000 to \$25,000,000, reflecting updated figures recently provided by the County of Napa and HdL. As a result, revenues for FY 2025 are expected to remain flat compared to the previous year. Table 2 illustrates the revised forecast for the current year of Measure T revenues and provides a preliminary forecast of Measure U revenues.

NAPA VALLEY TRANSPORTATION AUTHORITY (NVTA) HIGHLIGHTS

Napa Valley Transportation Authority (NVTA)'s receipts from October through December were 0.9% above the fourth sales period in 2023. Excluding reporting aberrations, actual sales were down 2.4%.

Continued slowing in the wine industry caused an almost 9% decline this quarter. While other tourist related categories were

slightly up, including almost a 1% gain in fine dining, which was down 5% statewide. The slowing in the wine industry impacts both the convenience/liquor stores and food service equipment in food-drugs and business-industry groups respectively.

With the opening of a new outlet in general consumer goods, the group grew 8.6%,

online shopping grew over 7%, which also helped the group, but these gains were hiding slowing in family apparel, home furnishings, and specialty stores.

For the second consecutive quarter global crude oil prices were in retreat mode, resulted in service stations submitting 17% less taxes.

The lack of improving interest rates and the vacillating tariff policies and other uncertainties caused extended slowing in the building-construction group.

Locals purchasing new motor vehicles was down in trend with the statewide sales, but the registration of used was up 8%.

Net of aberrations, taxable sales for all of Napa County declined 2.1% over the comparable time period; the Bay Area was down 0.5%.

STATEWIDE RESULTS

California's local one cent sales and use tax receipts during the months of October through December were 1.2% lower than the same quarter one year ago after adjusting for accounting anomalies. The fourth quarter is notably the highest sales tax generating period of the year but exhibited diminished year-over-year returns as consumers struggled with tariff concerns and pulling back on discretionary spending.

For the past eight quarters - two calendar years - statewide results have declined; led mostly by autos-transportation and building-construction suppressed activity due to the sustained high interest rate environment. Specifically, this quarter, as new and used car returns pulled back, only leasing activity improved likely representing buyers willingness to wait for more advantageous economic conditions before committing to long term obligations. Furthermore, building-construction drops spanned multiple categories including building materials, plumbing/electrical and contractors as property owners delay repairs and improvements until they're more comfortable tapping available equity.

During this holiday shopping period, brick-and-mortar general retailers slumped 2.4%,

further hindered by lower gas prices. Recent closures by merchants selling variety/low priced items and weaker returns from department stores were most impactful. As consumers appeared more interested in value/discounted items vs higher priced/luxury goods, overall statewide receipts revealed growth from online retailers by way of local returns through fulfillment centers and allocations via each county's use tax pool demonstrating a desire to spend, just more through different vendors which shifted local tax distributions.

Fuel and service stations experienced a drop of 14% largely due to the decreased price of global crude oil. While this dynamic hurt the sector results, it did allow for more disposable income to be spent in other areas and does not appear to be changing in the near term.

Revenue from restaurants sustained a modest gain of 1.3%, with only a waning from fine dining establishments – consistent with spending trends in other sectors. As eateries try and balance higher menu prices and demand, a 'return to office' call by businesses could inspire future increased foot traffic for many venues in metropolitan centers.

The fourth quarter also marks the end of the calendar year. As expected 2024 was 1.2% lower than 2023 with most sectors taking a hit. Only restaurants, business-industry and allocations via the county use tax pools improved.

With national tariff discussions happening at the federal level, consumers start 2025 wondering if higher priced goods and difficult decisions are on the horizon. Also, the Federal Reserve Board hasn't signified any relief by way of lower interest rates leaving only minimal growth expectations to come. The theme of the current economic outlook is uncertainty.

*Estimate is on an accrual basis (allocations for sales through June)

Note: Statewide factors influencing the forecast include uncertainty in most areas and rapidly evolving actions that can influence prices and spending and well as customers focused on value spending and limiting discretionary purchases.

*GCG: Costco opened 10/18/24, estimated to generate \$485K after considering a \$50K/FY offset for the impact its fuel island will have on existing gas stations. Kohl's store closed as of 2Q25.
